Office Manager

Date _____

Dear Parent/Guardian,

Today _____ had a vision screening courtesy of the Lions Club of Alabama. This screening was quick, painless and checked for the six most prevalent eye abnormalities. The earlier a vision disorder is detected and treated, the better it can be treated. This screening should not replace your annual checkup.

The Plusoptix device that the Lions Club used only took several seconds to screen each child. The screening results are displayed on the screen immediately after a measurement is completed. If one or more of the readings are outside of limits, a "refer" screening result is displayed.

Results identify: Refractive Error (nearsighted, farsighted and astigmatism); Binocular Alignment (strabismus, eye turns); Unequal Refractive Error (anisometropia); Unequal Pupil Size (anisocoria).

Your child's results are as follows:

_____ No abnormalities were detected at this time.

_____ One or more abnormalities were detected. Referral to an ophthalmologist or optometrist is recommended.

Thank you,
